

In an Emergency, Seconds Count! Can First Responders Find Your House?

Many times, our emergencies happen in the dark of night. Having your address well-marked will help First Responders find your home and come to your aid more quickly.

Help your First Responders by putting **contrasting or reflective** address numbers **at least 3 inches high** where they are visible from the street.

Suggested locations are:

- Over or next to the front door
- Over or next to the garage door
- On the mailbox if it is located at the curb
- On the curb of the street
